PROJECTS

Automatic Water dispenser (Internet of Things)

July 8, 2019 - Oct. 15, 2019

Mentor: Prof B.N. Jagdale | Team Size: 4

Key Skills: Arduino UNO Relay Coding

This project is to design and develop an automatic Water dispenser machine that suitable for various kind of container. The machine will be operated by placing the container and pour the liquid or water at the same level in any size of container. This resulted in no wastage of water.

Also we don't need to touch the dirty knob again and again.

SCOPE –

This project can be used in many more places like toilets , kitchen, hospitals, and automatic irrigation system ,automatic car washing center ,and in cafes like automatic sauce dropper and many more things .

Football league Management System (Database Management System)

July 8, 2019 - Sept. 30, 2019

Mentor: Prof. Varsha Powar | Team Size: 4

Key Skills: DDL DBMS SQL NetBeans Frame Java

The purpose of this project is to provide a friendly environment to maintain the details of players, Team, League and every record needed. This project is inspired by the fact that many football fans are unable to see their favorite team matches due to several reasons like they are out with friends or busy somewhere else so we provide them with the software where they can see the summary of the games. They can find the stats of players, teams, leagues, points table etc.
